

EVO™ 30" SHEAR

1 Cutting Force:
680Te

2 Cutting Capacity:
30", 24", & 18" OD Variable
Pipe Jig

3 Supply Pressure:
5000psi

4 Weight & Dimensions:

Length: 4400mm
Bredth: 2200mm
Height: 315mm
Weight: 8,000kgs

marin™

The EVO™ 30" Shear can be used for the following applications:

- Flexibles' & Pipelines <30"
- Cold Cutting
- Decommissioning of Subsea Structures
- Asset Intervention

The EVO™ 30" Shear is operated in conjunction with the hydraulic power pack complete with interconnecting hoses.

The EVO™ Shear was originally developed to cut large reinforced concrete pilings on bridge demolition projects.

Marin Shear Power Services boasts an efficient installation time and can complete full cuts in rapid time on all pipelines including concrete weight coatings.
