

# EVO™ MMRS GRAB

1

Workload:

100Te

2

Operating Depth:

Full Ocean Depth

3

Supply Pressure:

3500psi

4

Weight & Dimensions:  
(Open/Closed)

OD: 2700/500mm

Height: 3800mm

Weight: 26,000kgs

marin™

The EVO™ MMRS Recovery System can be used in the following applications:

- Flexibles & Pipelines <46 Recovery/Relocation
- Concrete Mattress Recovery/Relocation
- Boulder & Debris Recovery/Relocation
- Wreck Recovery
- Redundant Pipeline Recovery
- Grout Bag Recovery/Relocation

Purpose built and designed by Marin, the EVO™ MMRS Recovery System is a hydraulically driven subsea recovery unit.

Deployable by crane wire and drill string, the MMRS Grab can lift 50-100Te workload.

The unit has capacities of up to 800Te of grip force, with a maximum pipeline capacity of 46"OD (Variable).
